## INTRODUCTION.

---

This atlas is composed of 76 maps, of which 15 are new and made especially for it, while the remaining 61 are facsimile reproductions of old ones. Of these facsimiles 48 are reproductions of maps previously published, while the remaining 13 are made from manuscripts.

The atlas has been prepared and printed under the direction of a COMMISSION appointed by the President of the United States in pursuance of the Act of Congress approved December 21, 1895, TO INVESTIGATE AND REPORT UPON THE TRUE DIVISIONAL LINE BETWEEN THE REPUBLIC OF VENEZUELA AND BRITISH GUIANA.

The new maps have been made, the old ones selected, and the whole arranged for the purpose of illustrating papers embodying the results of the investigations made by this Commission. Pursuant to this purpose, the maps fall naturally into three groups, as follows:

Part I consists of 15 maps, numbered 1 to 15, and exhibits graphically historical and geographical data gathered by the Commission. The same base map is used throughout this group. This base map has been compiled, drawn, engraved, and printed under the direction of the Commission.

Part II consists of 41 facsimile reproductions of maps previously published. These have been selected and arranged with a view to illustrating a report, by the Secretary of the Commission, on the Cartographical Testimony of Geographers.

Part III consists of facsimile reproductions of maps emanating from official or semi-official sources. These are largely from manuscript originals hitherto unpublished, and have been partly collected by the Commission, partly submitted to it. They are here printed to illustrate a report, by Professor George L. Burr, on Maps from Official Sources.

Note.—Governor Storm declared this Map handed in by him to be a copy of one made by the Spaniards. The present map is clearly not only a copy, but a translation into Dutch. As its handwriting is not that of Storm van 's Gravesande, and as names are misspelled in a way impossible to him, it is somewhat doubtful whether it is that actually handed in by him or only copied from it. Map No. 5 of the British Atlas Book "Venezuela No. 1, 1806, Appendix III," is a reproduction of this Map, from a manuscript copy dated 1807.
